YEO appointment to accelerate work on energy storage systems

YEO Technology, one of Türkiye's leading technology and engineering companies, and Kaltun Enerji DOO Skopje have signed an agreement for the 44 MW Wind Power Plant to be built in North Macedonia. YEO Technology undertook the design, engineering, procurement, installation, testing, and commissioning of the project.

#itspossible

YEO Technology, one of Türkiye's leading technology and engineering companies, announced that it will collaborate with Kaltun Energy DOO Skopje for the wind power plant (WPP) to be built in North Macedonia. An agreement was signed between YEO and Kaltun Enerji for the construction of electrification and automation works of the **44 MW Wind Power Plant** to be built in North Macedonia.

Pursuant to this agreement, YEO Technology will undertake the electrification and automation of the power plant, namely design, engineering, procurement, installation, testing, and commissioning works. With this project, which will be realized at an approximate price, YEO Technology will add a new one to its international projects.

Delivering energy and industrial solutions all around the world in Europe, Middle East, Central Asia, and Africa with **more than 225 projects in more than 30 countries in 3 continents**, YEO Technology has been one of the most innovative companies in the sector with **more than 450 employees for more than 18 years**. The Company also adds value to the national economy by carrying out activities that touch every aspect of energy, from electricity generation, transmission, and distribution to the smart and efficient use and application of energy.
