ISTANBUL, TÜRKİYE, OCTOBER 2022- Marketing

YEO to turn Sugözü - İskenderun into an energy island

İskenderun Energy (İSKEN) has signed an agreement with YEO Technology for the project of installing a hybrid solar power plant at Sugözü Thermal Power Plant (SUGES).

The 21 MW solar power generation plant to be built within the scope of the project will be one of the most important parts of the goal of transforming the Sugözü region of İskenderun into an energy island.

YEO Technology, one of Türkiye's leading technology and engineering companies, has agreed with Iskenderun Energy (ISKEN) for the installation of a hybrid solar power plant at Sugözü Thermal Power Plant (SUGES). The 21 MW solar power generation plant to be installed with this agreement will be one of the most important parts of İskenderun's goal of transforming the Sugözü region into an energy island.

Undertaking all construction works

İSKEN General Manager Dr. Sırrı Uyanık and YEO Technology Chairman and CEO Tolunay Yıldız along with officials from both companies attended the signing ceremony held in Ankara. YEO Technology will undertake all engineering, procurement, and construction works for the installation of the hybrid solar power plant project at Sugözü Thermal Power Plant.

Speaking at the signing ceremony, İSKEN General Manager Dr. Sırrı Uyanık stated that they want to transform the area where the Sugözü Thermal Power Plant is located into an energy island: "The hybrid solar power plant to be established with this goal is very important for us as the beginning of this transformation."

Mr. Tolunay Yıldız, Chairman and CEO of YEO Technology, said that it is a source of pride for them to be preferred by İSKEN in an important project: "As YEO, we are excited to contribute to İSKEN's vision in the field of renewable energy. As an important solution partner of İSKEN's work in the field of renewable energy in Türkiye, we aim to successfully complete the project in the desired quality and in due time."

Maximizes energy production

YEO Technology offers one-stop integrated solutions for energy and digital transformation on its way to a clean and sustainable world. YEO Technology produces projects for a cleaner future with hybrid solutions that bring together multiple renewable energy systems. Carrying organizations to a carbon-free future with hybrid systems by integrating solar or wind energy into existing power plants, YEO Technology continues to grow in this field in Türkiye.

YEO Technology, which is positioned as an EPC in all areas it operates, especially in renewable energy, provides turnkey installation services with end-to-end solutions. In addition to the active global business development network it has created, YEO produces permanent solutions for investors in the field of renewable energy with its cooperation in the financial field, including for finance, project, license, engineering, construction, procurement, and audit.
