ISTANBUL, TÜRKİYE, OCTOBER 2022- Marketing

One of the most important urbanization meetings of the Mediterranean...

YEO introduces energy solutions for sustainable cities at Urban Forum 2022

YEO, one of Türkiye's leading engineering and technology companies, presented energy, water and oil & gas solutions for sustainable cities at Urban Forum 2022 Istanbul, which hosted participants from Türkiye, Italy, Malta, and Libya. More than 300 senior executives from the region attended the forum, where the future of urbanization was discussed for 2 days.

YEO, one of Türkiye's leading technology and engineering companies, introduced its solutions for sustainable cities at the Urban Forum 2022 held in Istanbul on October 3 and 4. More than 300 senior executives from the region discussed the future of cities for 2 days at Urban Forum 2022, which hosted participants from Türkiye, Italy, Malta, and Libya.

Energy solutions attracted attention

Urban Forum 2022, the Libya-Türkiye Construction, Infrastructure, Contracting Services, and Real Estate Event and Conference, brought together representatives of the Mediterranean countries in Istanbul. During the event, public and private sector representatives of the respective countries discussed urban development, urbanization, sustainable solutions, and urban architecture. YEO, which offers solutions in the field of automation, electrification, and technology by focusing on decarbonization, decentralization, and digitalization, explained its solutions for cleaner and sustainable cities in the entire process from electricity generation, transmission, and distribution to smart and efficient use of energy. At the event, Libya's major companies and leading representatives of the sector visited YEO's booth, showing great interest. YEO attracted attention with its energy generation-transmission-distribution, renewable energy, oil & gas, and water solutions.

Leading digital transformation in energy

YEO offers one-stop integrated solutions for energy and digital transformation on its way to a clean and sustainable world. Positioned as an EPC contractor in all areas it operates, especially in renewable energy, YEO provides **turnkey installation services with end-to-end solutions**. In addition to the active global business development network it has created, it creates permanent solutions for investors in the field of renewable energy in areas such as finance, project, license, engineering, construction, procurement, and audit through its collaborations in the financial field.
