

PROTECTION OF NATURAL LIFE AND BIODIVERSITY POLICY

As YEO Teknoloji Enerji ve Endüstri A.Ş., we consider minimising the impact of our activities on the natural environment, contributing to the protection of ecosystems, and supporting biodiversity to be our fundamental environmental responsibility.

In this regard, we declare that we will operate in accordance with the following principles.

- We act in accordance with national and international environmental legislation, the United Nations Convention on Biological Diversity (UNCBD), and international principles such as the UN Sustainable Development Goals.
- Themes such as decarbonisation, circular economy, water efficiency, biodiversity conservation and human rights-sensitive investment are among the opportunity prioritisation criteria in business development projects.
- We aim to create value chains that include not only environmental but also social responsibility.

Protection of Natural Life

- We are committed to preventing the destruction of natural habitats and to carrying out production and operational processes that are compatible with local ecosystems.
- We research and implement alternative production and infrastructure solutions that do not harm natural life in our operations and the projects we undertake.
- We adopt a 'do no harm, repair' approach in the projects we carry out.

Biodiversity

- We consider the efficient use of natural resources in all our activities and reduce our environmental impact as part of our corporate responsibility.
- All work carried out in the areas of water, waste and biodiversity management serves the objectives of reducing environmental impact, sustainable use of resources, increased efficiency and strengthening corporate environmental awareness. Activities are regularly reviewed and developed in line with a continuous improvement approach.

- We conduct sustainability, climate change and biodiversity risk analyses across all our areas of activity and develop risk management strategies and actions.
- Activity planning is carried out with consideration for the habitats of endangered species.
- We avoid practices that could harm ecosystems at both local and global scales.

Our commitment:

- As employees and managers of YEO Teknoloji Enerji ve Endüstri A.Ş., we implement, enforce, support, regularly review, and continuously improve this policy, taking necessary actions in cases of non-compliance.
- Each YEO affiliate company complies with this policy to the extent possible and expects all Business Partners to act in accordance with this Policy, taking the necessary steps to ensure this.
- In the event of any discrepancy between this Policy and the local legislation applicable in the countries where YEO Teknoloji Enerji ve Endüstri A.Ş. and its Affiliates operate, the Policy or legislation that is more restrictive shall prevail, provided that the relevant application does not constitute a violation of local legislation.
