About YEO

Since 2004, we have been producing solutions that **reduce carbon emissions, add value** to infrastructure and industries through digitalisation for **sustainable energy supply**, and touch life, especially in our country and different geographies, with the knowledge and power we have by keeping **our innovative structure** at the focus of our business

We have been delivering energy and industrial solutions to every corner of the world with **over 700 employees** and **new investments in more than 40 countries** on **4 continents**.

We have **many things we say 'It's Possible'** and hundreds of employees who advocate them. Today, as a great team, we are working with all our strength with the responsibility of the trust placed in us to realise whatever we say is possible

Highlights of YEO

EPC

Technology Provider

Power Producer

System Integrator

Energy Transition Leadership

Future Technology

Global Presence
30+ Countries

Renewable &
Storage Solutions

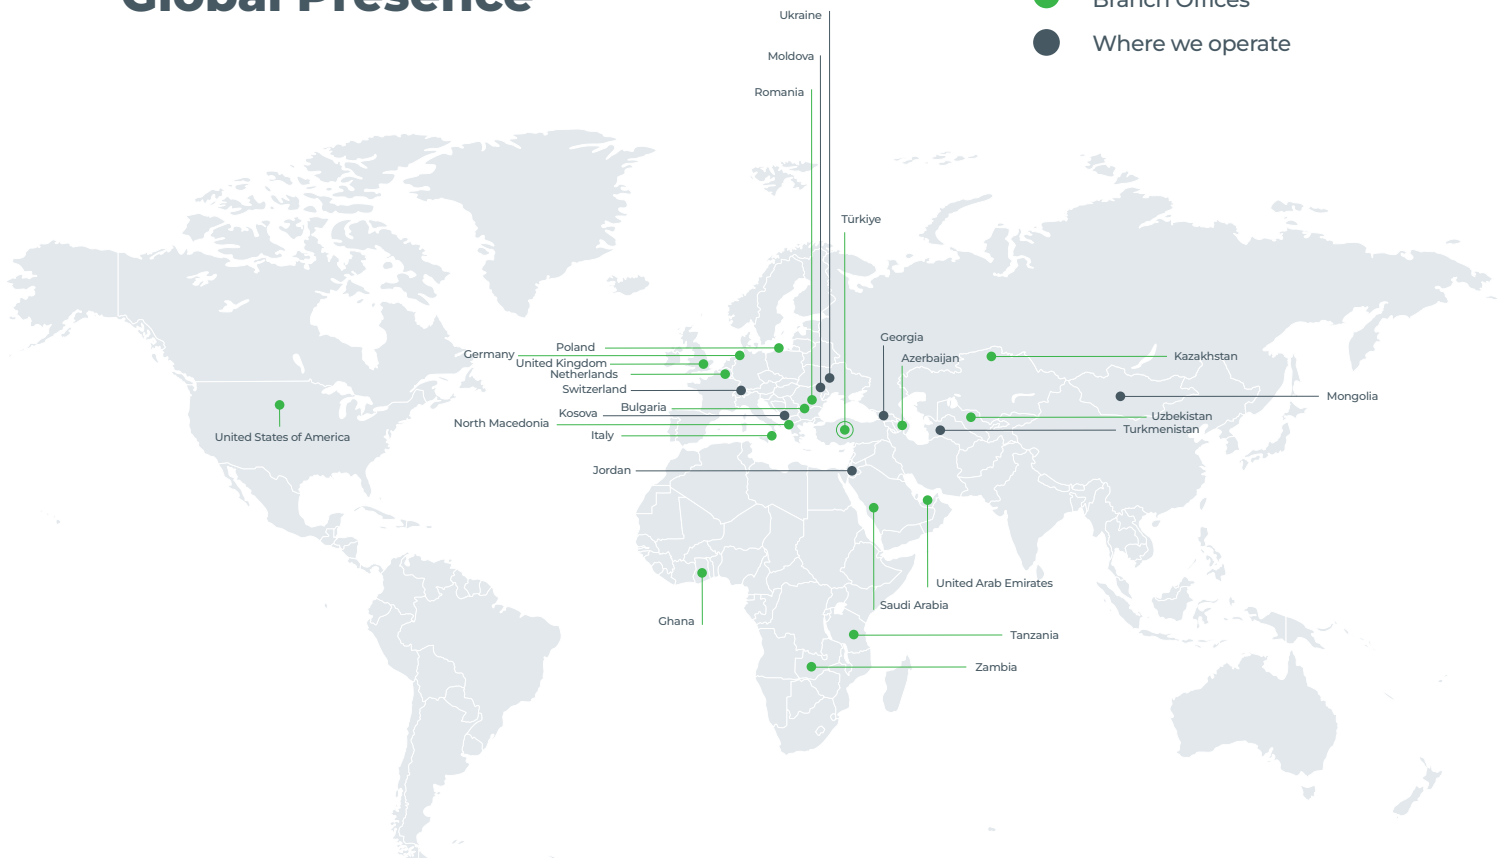

H i g h E x p e r i e n c e

Global Reach and Presence

We continue to **expand** our international network, **strengthen** our international partnerships and **broaden** our focus a global level

Global Presence

Business Segments

ZERO CARBON TECHNOLOGY PARTNER

With our future-oriented vision,
we encapsulate our dreams and
showcase our purpose to the world.

Digitalization

Developing electrification and energy efficiency solutions by using Internet of Things (IoT) and artificial intelligence technologies.

Decarbonization

Enabling the integration of renewable energy to achieve a zero-carbon future.

Decentralization

Ensuring the transformation and distribution of energy to improve efficiency, sustainability, and resilience.
