As YEO Teknoloji Enerji ve Endüstri A.Ş., we provide clean energy solutions to our customers.

In this regard, we declare that we will operate in accordance with the following principles.

- We comply with all legal regulations related to energy management, act in accordance with national/international legal and other requirements, and fulfil our obligations under the programmes we are members of.
- We develop clean energy projects to reduce dependence on fossil fuels and contribute to our customers' zero-emission targets.
- We follow and implement the latest technologies related to the efficient use of energy.
- We regularly collect, analyse and report data on energy consumption and energy performance.
- We aim to reduce our energy consumption and energy costs and increase energy efficiency.
- We aim to increase the use of renewable energy sources and continuously improve our energy management system.
- We identify risks that may be encountered in the scope of energy management and assess their effects. We identify and prioritise energy efficiency opportunities.
- We provide training to increase our employees' energy awareness, support energy saving and improvement suggestions, and encourage a participatory culture.
- We provide the necessary human resources, information, equipment, and financial resources to achieve YEO Energy Management's goals.

Our commitment;

As employees and managers of YEO Teknoloji Enerji ve Endüstri A.Ş., we implement, enforce, support, and regularly review this policy, take necessary action in cases of non-compliance, and continuously improve it.

- Each YEO affiliate company complies with this policy to the extent applicable and expects all Business Partners to act in accordance with this Policy, taking the necessary steps to ensure this.
- In the event of a discrepancy between this Policy and the local legislation applicable in the countries where YEO Teknoloji Enerji ve Endüstri A.Ş. and its Affiliates operate, the Policy or legislation that is more restrictive shall prevail, provided that the relevant application does not constitute a violation of local legislation.
